

## CHARGE EFFICIENTLY

### SCALABLE DESIGN TO MEET ALL YOUR NEEDS

Our chargers are the highest efficiency combination lead-acid and lithium-ion forklift battery chargers on the market. By using a series of parallel power modules, our chargers save energy and money by turning off modules as they become unnecessary for charging.

If a power module fails, the charger won't shut down but instead will continue to charge until the failed module can be replaced.

- The highest total charge cycle efficiency available
- One charger for all your needs
- Simplest serviceability in the industry

INDUSTRY-BEST

**92%+**

CHARGING EFFICIENCY

Modular architecture for scalability and simple repairs

Charge lead-acid and lithium-ion batteries

Optional PowerTrac system for multi-volt charging

Save money on charger repair
