

## CHARGE FASTER

### FLEXIBLE DESIGN TO MEET ALL YOUR NEEDS

Our opportunity chargers allow you to charge your lead-acid or lithium-ion forklift batteries during short periods of downtime, requiring less than the typical 8-hour charge cycle.

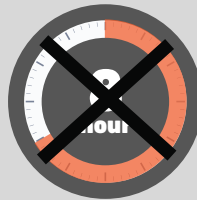

This not only makes your operation more productive, but it also saves you the danger and hassle of battery swaps and the capital investment for batteries and storage facilities.

- Modular architecture for efficient, scalable charging
- Simplest serviceability in the industry
- Our charger's "plug and play" design makes it simple and inexpensive to expand the power output to accommodate larger batteries

INDUSTRY-BEST
